### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 26 October 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1-17** rejected under 35 U.S.C. 102(e) as being anticipated by Seppanen (6330442).

As per **claim 1**, Seppanen discloses a cell phone system performing the method comprising the step of initiating communication with a base station and receiving an SID code from the base station (registering) (Col 8 lines 20-40). A further step (Fig. 3 steps D,E,G,H) comprises dialing a number and then determining any necessary call prefixes required by the registered base station based upon the information in memory 24 (Fig. 2). The appropriate prefixes are then appended, and the calling signal is send to the base station (Fig. 3 steps I, J).

As per **claim 5**, claim rejected for the same reasons as the claim 1 rejection. The means (in the cell phone of Fig. 2) are provided to perform the storing (Database is memory 24 in Fig. 2), dialing, registering, receiving the SID code, accessing the database, modifying the dialed number, and connecting to the registered base station as per the claim 1 rejection.

Art Unit: 2643

As per **claim 10**, claim rejected for the same reasons as the claim 1,5 rejections.

The phone inherently comprises the software to perform the steps of the claim 1,5 rejections for the purpose of controlling the cell phone hardware.

As per **claim 15**, claim rejected for same reasons as the claim 1,5 rejections.

Seppanen discloses an embodiment where the database is stored at the base station, and the prefix selection and appending is performed at the base station (Col 16 lines 16-41, Col 17 lines 10-37).

As per **claim 16**, claim rejected for the same reasons as the claim 1,5,15 rejections. The means are disclosed to perform the steps of the method.

As per **claim 17**, claim rejected for the same reasons as the claim 16. The system inherently comprises the software to perform the steps of the claim 1,5 rejections for the purpose of controlling the hardware that performs the steps of the method.

As per **claims 2,6,8,11,13**, the system defines one field in the database as SWDB#1 used to associate the correct prefixes to the correct dialed numbers (Col 23 line 55 to Col 24 line 8). The art further discloses the SWDB#1 field may comprise SID codes (Col 24 line 63 to Col 25 line 20).

As per **claim 3,7,12**, the system may search among a range of numbers defined by the SWBD#1 (Col 24 lines 8-25).

Art Unit: 2643

As per **claim 4,9,14**, claim rejected for same reasons as the claim 3 rejection. In the case that the code being searched for is one of the endpoints of the predetermined range of codes, the system will check the code compared to each number at the endpoints of the range (searching for the code). If the code is not found at the end points, the entire range will be searched to see if the code is encompassed by the range.
